- TACE
- The University of Manchester
- University of Sheffield

ABOUT

As a design professional, Steve has used AutoCAD since Release 13, for over twenty-five years.

Having graduated from Leeds Polytechnic with a degree in Three-Dimensional Design and a specialism in furniture design Steve worked as a freelance furniture designer where he gained valuable knowledge and practical experience.

Steve has been delivering training as an Autodesk Approved Instructor since 1998 as the Built Environment Solutions Trainer formally for Cadassist Ltd and more recently for Symetri Ltd.

Between 2005 and 2013 Steve held the position of CAD Manager for Blackpool Councils Central Seawall Project, which was awarded the prestigious Brunel Award. As a Senior BIM Consultant for Symetri Ltd, Steve specialises in delivering training within AutoCAD, Revit Architecture and Revit MEP.

My passion is delivering training where I have the opportunity to pass on the knowledge and practical application of the software that I have acquired during my career to new users and teams. Every day is most certainly a school day within my role as a trainer. Which always excites and furthers my passion for learning and reconfirms the importance of training, sharing knowledge and understanding to our next generation of CAD and BIM users.
