ABOUT

Prior to joining Symetri, Allan's role as a Principal Technologist (BSc ACIAT) for a leading healthcare Architect, provided a wide range of experience in many aspects of technical design, BIM and business processes. In his 15+ years of industry experience, he has played a leading role in the development & implementation of PAS 1192/ISO 19650 company standards with company accreditation since 2016. This included internal training and support practice wide of the Autodesk design tools: Revit, Navisworks and BIM360/ACC amongst others.

Allan thrives on helping others, solving problems and promoting the use of technology.

Allan is currently supporting clients through a range of engagements from ACC setup/implementation & support, ISO 19650 accreditation, model audits, BIM & software training. In addition, Allan acts as a BIM Coordinator for several large Middle East projects.

I have a passion for technology and utilising digital tools to help everyone work smarter for all round better outcomes. My experience underpins my drive for compliance, and the requirement for robust documentation. Something which I passionately believe digital tools are the only solution. I enjoy keeping up-to-date with the latest industry trends and developments, most recently the Building Safety Act.
