ABOUT

Natalie has both a First-Class BA Honours Degree in Interior Architecture and a Masters Degree in Architecture and Urbanism.

She subsequently gained experience across a variety of different disciplines working in architectural design, interior design, urban design and geospatial science. Natalie has managed and coordinated numerous high-profile projects for flagship clients including Buckingham Palace, the MOD, the FCO, Nuclear Decommissioning Authority as well as commercial, educational and civic projects.

Natalie's industry experience has equipped her with the technical knowledge, skills and expertise in the utilisation of a range of Autodesk applications.

As a Consultant and Professional Certified Autodesk Instructor at Symetri, Natalie frequently consults with clients and delivers training on Autodesk Revit and Naviate Architecture to a variety of multi-disciplined industry professionals.
