- Adobe Illustrator, Photoshop & InDesign

## KEY ORGANISATIONS

- Grimshaw
- Kohn Pedersen Fox
- Prior + Partners
- Foster + Partners
- Haworth Tompkins
- ARUP Associates
- TAIT Technologies

## ABOUT

Christian comes to Symetri with various architectural specialist roles at esteemed organisations. Formerly at Grimshaw Architects, his extensive experience in Computational Design coupled with BIM allows him to assume the responsibilities of assessing complex project design goals. Natural leadership and strategic planning capabilities permit him to effectively integrate the right mix of technology, processes and training to address an organisation's unique needs. Christian understands that maintaining a long-term, successful BIM strategy requires the dedicated support of a partner to stay current on technology, troubleshoot issues and look for additional opportunities to leverage computational design.

Christian holds a Dip Architecture degree from The London School of Architecture from The Bartlett School of Architecture, UCL.
