- BIM Implementation
- BIM Authoring
- BIM Management
- Data Analysis
- Design Workflows Automation
- Digital Transformation

KEY ORGANISATIONS

- Gibson Thornley Architects
- Populous
- The Thomas Saunders Partnership
- TDO Architecture

ABOUT

With a background in architecture and digital design consultancy, Pietro has matured an extensive experience in successfully implementing BIM in design practices. He is skilled in assisting clients in developing strategies for a full BIM adoption, working side by side with them to ensure an effective and consistent transition at company and projects level.

His deep understanding of AEC industry standards, protocols and technologies is enriched by his ability to develop solutions including design workflows automation, model performance analysis and a Revit model early embodied carbon calculator.

Pietro holds a Master's Degree in Architecture and a Postmaster Degree in BIM Management.

Digital transformation has a profound impact on our world, lives, and jobs. The AEC industry is undergoing an unprecedented cultural and technological evolution, calling for new expertise capable of bridging the gap with more traditional and established roles. By embracing this change, we unlock boundless opportunities to elevate job quality, drive exceptional efficiency, and maximise the utilisation of time, ushering in a new era of remarkable advancements in our work.
